### Carbon Steel

Carbon Steel has great durability and heat retention capability.

Once thoroughly heated, the heavy-duty carbon steel cookware retains heat for a very long time, saving you a great deal of energy.

Enamel coating brings eco-friendly non-stick performance to today's cookware. It is essentially a vitreous enamel glaze that protects the cookware. It also gives you a cooking surface that is uniform and smooth and very easy to clean.

# PIERRE CARDIN

---

Work ethics and vision of future are two of the qualities that have made this Italian born fashion designer famous. Pierre Cardin is considered, among other things, the creator of the concepts unisex and prêt-à-porter.

Pierre Cardin was also a pioneer in the now common practice of applying fashion ideas to porcelain and cutlery. The style made famous by Pierre Cardin is still reflected faithfully in the current collections.
